

CLAIMS

What is claimed is

- 1 1. A computerized method, comprising:
2 constructing one or more websites;
3 providing archive software on a computer comprising:
4 one or more methods of website data selection;
5 archiving selected website data to a storage medium.
- 1 2. The method of claim 1, wherein the computer is a server.
- 1 3. The method of claim 1, wherein the selected website data comprises one or
2 more visual files.
- 1 4. The method of claim 1, wherein the selected website data comprises one or
2 more website characteristics.
- 1 5. The method of claim 1, wherein the selected website data comprises one or
2 more types of business data.
- 1 6. The method of claim 1, wherein at least one of the one or more types of
2 business data is hidden business data.
- 1 7. The computerized method of claim 3, wherein the one or more visual files are
2 of a type chosen from a group consisting of video, photographs, text, and artwork.
- 1 8. The computerized method of claim 4, wherein the one or more website
2 characteristics are chosen from a group consisting of: order history, banners, page
3 templates, editing tools, and site features.

- 1 9. The computerized method of claim 5, wherein the one or more types of
2 business data are chosen from the group consisting of: user account data, order
3 history, credit history, inventory, camera settings, and photographer.
- 1 10. The computerized method of claim 1, wherein a button on a computer is
2 interactive with archiving selected website data.
- 1 11. The computerized method of claim 10, wherein archiving selected website
2 data is accomplished automatically to a set schedule.
- 1 12. The computerized method of claim 1, wherein a dial is interactive with
2 selecting the website data.
- 1 13. A computerized method, comprising:
2 constructing a website having information, comprising:
3 archive software,
4 one or more photographs,
5 one or more website characteristics, and
6 one or more types of business data;
7 copying a selection of the website information to a storage medium.
- 1
2 14. The computerized method of claim 13, further comprising:
3 copying a selection of information to a storage medium from more than one
4 website.
- 1 15. The computerized method of claim 13, wherein a dial is interactive with the
2 selection of website information.

- 1 16. A computerized method, comprising:
2 constructing a website having information, comprising:
3 archive software,
4 one or more visual files,
5 one or more website characteristics, and
6 one or more types of business data, comprising:
7 visible business data, and
8 hidden business data;
9 archiving selected information at the website to a storage medium; and
10 archiving selected information at a non-website to the storage medium.
- 1 17. The computerized method of claim 16, further comprising:
2 archiving selected information located at one or more websites.
- 1 18. The computerized method of claim 11, wherein archiving selected information
2 is interactive with a dial.
- 1 19. A computerized method, comprising:
2 placing archive software on a user's computer;
3 constructing at least one website, comprising:
4 visual files,
5 web page characteristics,
6 business data; and
7 archiving selected data from one or more of the at least one website to a
8 storage medium.
- 1 20. The computerized method of claim 19, wherein the archiving is interactive
2 with a dial.

002727" 5455E.60

1 21. The computerized method of claim 19, wherein archiving is automatically
2 initiated to a pre-set schedule.

1 22. A computerized system, comprising:
2 a server, comprising:
3 a website, comprising:
4 one or more web pages controlled by the server, comprising:
5 web page characteristics,
6 business data, and
7 visual files,
8 archive software;
9 a remote computer having a storage medium, receiving from the server the
10 archive software to archive copies of the web page characteristics, the business
11 data, and the visual files to the storage medium.

1 23. The computerized system of claim 22, wherein the archive software further
2 comprises:
3 security software to restrict data that can be archived by the remote computer.

1 24. The computerized system of claim 22, wherein the website further comprises
2 links to other websites.

1 25. The computerized system of claim 22, wherein the archive software allows copy
2 to the storage medium of web page characteristics, business data, and visual files from
3 the linked websites.

1 26. A computerized method, comprising:
2 constructing one or more websites with one or more servers;
3 providing archive software on at least one of the one or more websites;
4 archiving all website information, made available by the one or more servers to a
5 storage medium.

1
2 27. The computerized method of claim 26, wherein the archival software further
3 comprises:
4 security software to limit the website information available for archiving.

1 28. A computerized method, comprising:
2 constructing one or more websites, comprising:
3 archive software on at least one of the one or more websites,
4 visual files,
5 website characteristics, and
6 business data;
7 providing password protection on at least one of the one or more websites; and
8 providing banners on at least one of the one or more websites.

1 29. The method of claim 28, further comprising:
2 constructing in at least one of the one or more websites, software to allow for
3 business transactions over the Internet.

1 30. The method of claim 26, wherein the archive software allows for a depth of linked
2 websites to be specified for selection.

1 31. A computer-readable medium having computer-executable instructions to cause a
2 computer to perform a method comprising:

3 operating one or more servers;

4 providing website information by the one or more servers, comprising:

5 archive software, and

6 security software,

7 banners; and

8 archiving a selection of website information to a machine-readable medium.

1 32. The method of claim 31, further comprising:

2 purchasing a portion of the website information.

1 33. A networked server system comprising:

2 one or more websites;

3 at least one archive software on the one or more websites;

4 one or more servers operating the one or more websites;

5 website information, comprising:

6 business data on at least one of the one or more websites;

7 hidden business data on at least one of the one or more websites;

8 one or more visual files on at least one of the one or more websites;

9 one or more website characteristics on at least one of the one or

10 more websites;

11 one or more a machine readable storage mediums;

12 one or more banners residing on at least one of the one or more websites;
13 wherein the archive software is interactive with the one or more websites for archiving
14 website information.

1 34. The networked server system of claim 33, wherein the archive software includes a
2 password protection for the website information.

1 35. The networked server system of claim 33, wherein the website information
2 includes billing information.
